

Workforce Planning

FEDRA

WE CREATE SMART FACTORIES

Employees are the most important resources.

An effective **workforce scheduling** integrating the **qualifications** of your employees is essential.

Motivation

"We need to **keep an eye** on the **qualifications** of our employees in order to know who can do what. After all, the forklift driver cannot set up a machine."

"We have employees working in **shifts** and others with **core working times**. We must bring together both and ensure **availability** of important functions at the same time."

"Some of our machines can only be operated by **specific employees**. If they are not available, these machines cannot run. The planning must **account for this**."

Your Issue

- Deploy your employees according to their qualifications.
- Use APS FEDRA to cover fluctuating workforce requirements.
- Schedule shift workers and employees with core working times in the same system.
- Combine personnel planning and order planning.

Our Solution

With the mApps of the FEDRA category Workforce Planning, you can...

- ... plan your employees at different workplaces and for different functions – integrate job sharing and job rotation.
- ... factor in qualifications of your employees.
- ... take over workforce requirements from order planning.
- ... integrate order and resource-specific personnel requirements.
- ... manage qualifications of your employees digitally – also temporary ones.

Use **APS FEDRA** Workforce Planning to
perfectly deploy your employees
according to their qualifications and still
remain flexible.

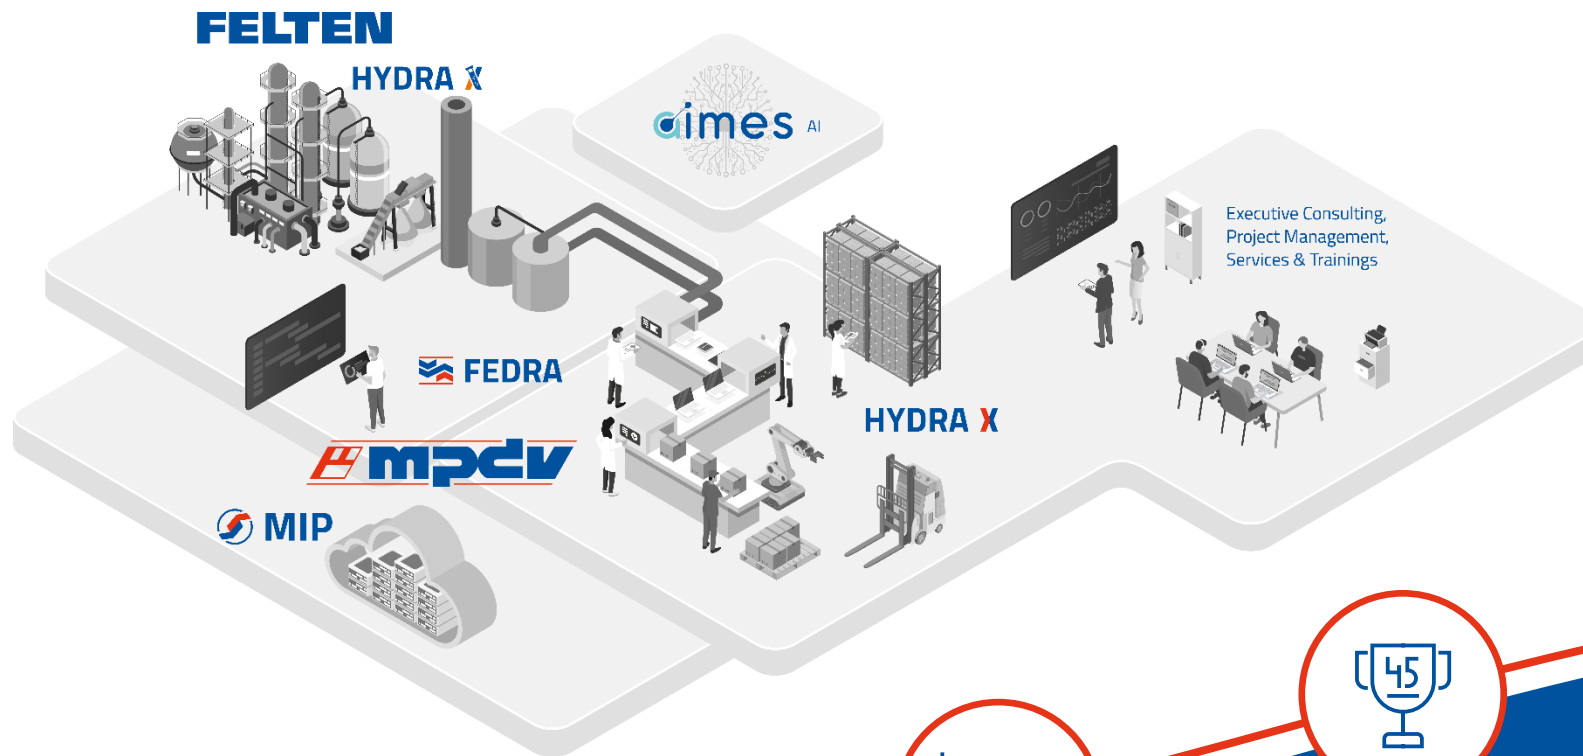

Profit Now!

A photograph of a modern industrial building complex. The main building is white with blue accents and multiple windows. A smaller, more angular building with a blue roof and glass facade is on the right. The sky is blue with white clouds. A red line graphic runs across the bottom of the image, ending in a white circle on the left.
