

Order Management

HYDRA X
BUILD YOUR FACTORY SMART

WE CREATE SMART FACTORIES

Do you always have your **production orders**
in sight? ...and under control?

Motivation

"We have an **incredible amount of paper** in our production. We print out several pages for each order and some of them have to be **filled in and returned** to the work scheduling department. It's hard to **keep track** of everything..."

"Yes, we do have **KPIs**, but they are always several days **old**, because it is very **time-consuming** to calculate them.

"**Express shipping** and **prioritized orders** are our daily business. Our **lead times** are not perfect either. We simply lack **transparency** in production."

Your Issue

- Reduce paper consumption.
- Create more transparency in the shop floor.
- Evaluate historical data consequently.
- Identify non-productive times and exploit your entire potential.
- Integrate established lean methods.

Our Solution

With the mApps of the HYDRA X category Order Management, you can...

- ... download orders and operations from the ERP, APS or other system & upload results.
- ... manage orders and operations directly in HYDRA X.
- ... support your work scheduling department.
- ... collect data in the shop floor without any paper.
- ... directly evaluate data & calculate KPIs in real time.

Exactly knowing the production processes

Your Benefits

With **HYDRA X** Order Management,
you always keep track and have your
orders in view.

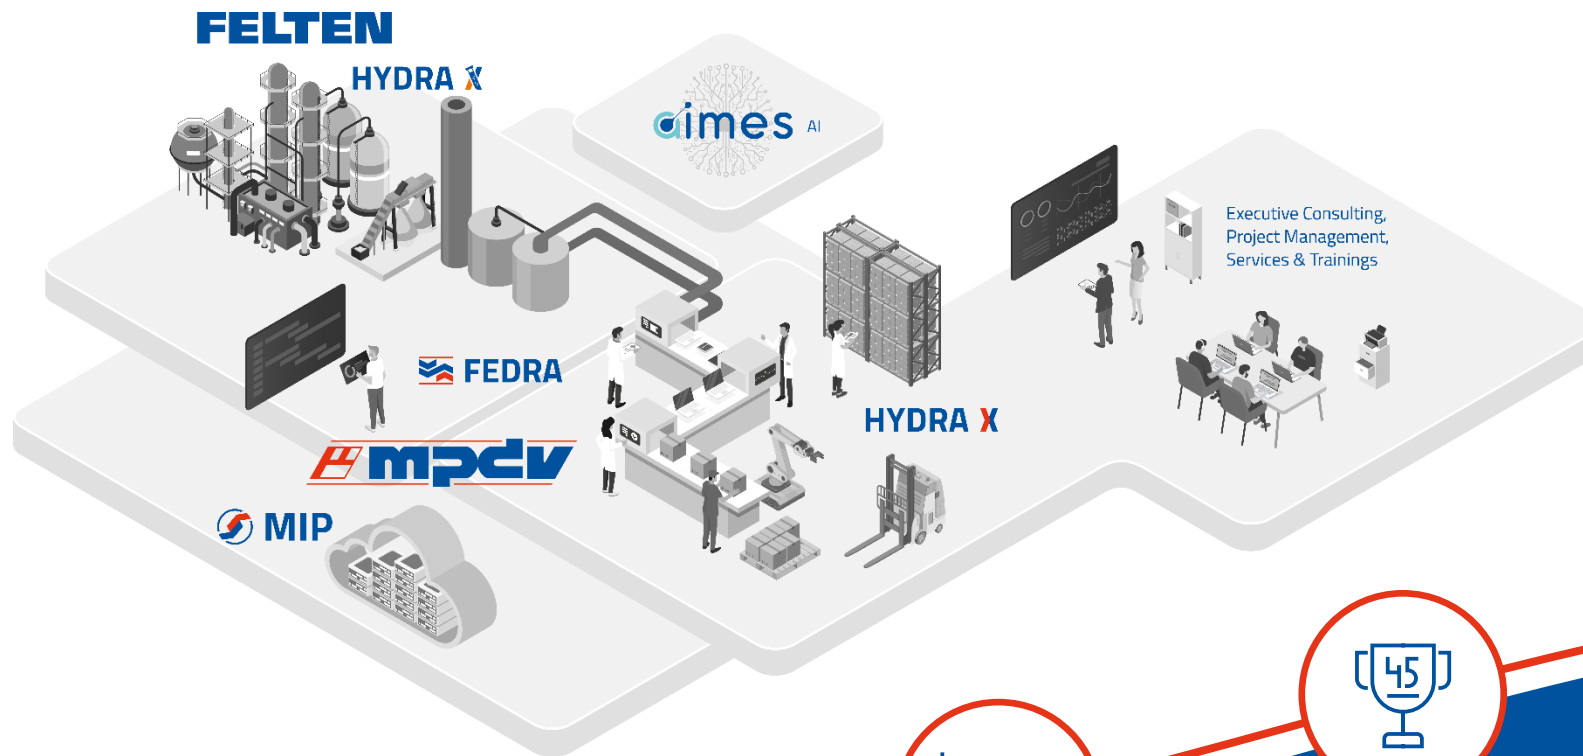

Profit Now!

A photograph of a modern industrial building complex. The main building is white with blue accents and multiple windows. A smaller, more angular building with a blue facade and large glass windows is on the right. The sky is blue with white clouds. A red line graphic runs across the bottom of the image, ending in a white circle on the left.
